

EHS Policy

We are committed to fostering a safe and healthy work environment for all employees, contractors, and visitors, while minimizing the environmental impact of our operations. This commitment is realized through proactive risk management, Continual improvement, and a deep-rooted culture of sustainability.

Our Commitments

- Design and operate our supply chain processes and services to prioritize safety and minimize environmental footprint.
- Comply with all applicable Environmental, Health & Safety (EHS) regulatory requirements, industry codes, and standards.
- Integrate EHS considerations into business decisions and day-to-day operations.
- Promote accountability by requiring our contractors and suppliers to meet JUSDA's EHS expectations.
- Engage stakeholders to support and enhance our EHS leadership and performance.
- Conserve natural resources, minimize waste generation, protect biodiversity, and prevent pollution.
- To provide safe and healthy working conditions to prevent work-related injuries and ill health.

Environment Objectives

- Ensure compliance with all legal and applicable environmental requirements.
- Divert operational waste from landfills through effective waste management.
- Optimize energy consumption across logistics and operational functions.
- Improve water efficiency in all facilities and supply chain processes.
- Foster green spaces and implement sustainable practices throughout our operations.

Health & Safety Objectives

- Comply with all applicable occupational health and safety regulations and standards.
- Implement and maintain comprehensive EHS programs across all JUSDA locations.
- Cultivate a robust safety culture that prioritizes the health and well-being of our workforce.
- Reduce incidents involving forklifts and vehicles within our facilities through targeted safety initiatives.
